InfraSoft Ver 2.0 Infrastructure Asset Management from Informatics India drives maximum value from assets and attains operational excellence under increasing operational, financial and environmental scrutiny.

InfraSoft is a customizable framework application for infrastructure asset management that seamlessly combines data management and analysis into one centralized application. With InfraSoft unique flexibility, managers now have the ability to integrate assets with all aspects of their infrastructure into one central data repository.

InfraSoft delivers a structured asset management system, where three fundamental areas - data management, optimized analysis and flexible reporting - all work in unison.

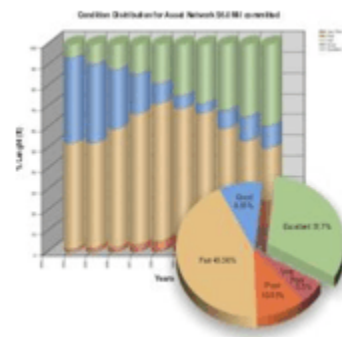

InfraSoft 2.0 handles.

- Asset Management;
- Trouble Ticketing;
- Service Contract Management;
- Insurance Policy Management and
- Financial Reporting.

Trouble Tickets are generated and assigned to the Service Providers seamlessly.

INFRAISOFT FEATUTURES

- ✓ Centralized database for all asset information
- ✓ User definable queries
- ✓ Cross asset optimization
- ✓ Increased efficiency
- ✓ Unlimited flexibility
- ✓ Concurrent transformation of data

SOFTWARE ARCHITECTURE

To support our wide range of users, asset types and deployment options, InfraSoft provides an open, customizable enterprise architecture that serves as the foundation for our integrated solutions. InfraSoft is built around a robust and established core platform that enables us to seamlessly leverage and integrate with existing IT infrastructures. Key aspects of InfraSoft's architecture focus on:

Scalability: With increasing demand from users to incorporate multiple asset types and their supporting data, InfraSoft does not limit your database size. In addition, you can easily scale your application to support multiple CPUs.

Data Integration: InfraSoft provides integration to your other databases. InfraSoft pulls relevant information from these existing databases for use with various analysis models.

Accessibility: To support multiple users across a department, agency or state, InfraSoft may be deployed locally within a LAN or online via a web browser, with tailored user access rights based on individual roles and responsibilities.

Security: To protect and limit access to your asset management projects, InfraSoft supports various levels of security, from software keys to defining end user access rights, roles and responsibilities.

IMPLEMENTATION.

Our comprehensive solutions are designed to support you through each phase of implementation to ensure the deployed program is “done right the first time.”

- InfraSoft solutions are delivered on time and on budget, surpassing client expectations.
- InfraSoft follows a proven five-phase implementation process with a 100% satisfaction rating
- InfraSoft's solutions adapt to your asset management philosophies and way of doing business
- InfraSoft solutions seamlessly integrate with your existing legacy systems and databases.

Our Five-Phase Implementation Methodology

- Phase 1 - Database Development
- Phase 2 - Analysis Development
- Phase 3 - Strategy Generation & Optimization
- Phase 4 - Delivery & Training
- Phase 5 - Post Implementation

POST-IMPLEMENTATION

InfrSoft Ver 2.0 provides sustainability and promotes organizational efficiency across agencies.

With our post-implementation services, we provide your agency with around-the-clock dedicated support and technical guidance. This support ensures that not only is your investment being used but that it continues to deliver repeatable and accurate results.

TRAINING

Our training courses focus on one common goal: to prepare our customers, distributors and consultants to successfully implement and maintain our asset management solution, ensuring the solution continues to deliver the most value and results.

- A proven instructional methodology.
- Courses tailored to your group.
- Courses that focus on real-world examples and hands-on practice sessions.

SERVICES

The InfraSoft support team is among the best in the industry, providing you and your team unsurpassed support and technical guidance. you always receive the most value and efficiency from your asset management investment.

We provide a variety of services to support both our products and your implementation. Working on-site or remotely, our team uses their significant experience to consult with you, focusing on “best in class” asset management practices. This approach ensures a successful deployment of our asset management solutions with continued support through our post-implementation services.

RETURN ON INVESTMENT

We implement solutions based on your existing infrastructure asset management philosophies. While some fundamental core methodologies are common across most organizations, the overall approach to asset management would be quite different between organizations

We develop custom Software in order to support your current and long-term objectives, and flexible enough so that implementation will not affect organizational efficiency. Implementing InfraSoft, will result in significant savings across your agency or department.

Value InfraSoft Delivers:

- ✓ Increased employee efficiency
- ✓ Captured local engineering knowledge
- ✓ Make informed decisions
- ✓ Forecast asset condition to determine future needs
- ✓ Consider multiple asset types
